

AUTISM SERVICES

Applied Behavioral Analysis

Ages 18 months to 10 years

What is Applied Behavioral Analysis (ABA)? ABA is a science based on the principles of learning and behavior. It is a highly trusted and evidence-based form of therapy that focuses on the whole child. The result? Individualized care plans for your child and family.

Partnering with Parents Center Opened in October 2018, our center was custom-designed for our families. Lots of natural light, cozy rooms, and bright colors.

How Can We Help? Our team of 13 highly trained Board Certified Behavior Analysts, Qualified Behavioral Health Professionals, and Behavior Technicians are here to help with:

Building Positive Behavior Skills

- Communication and language
- Daily living (e.g., dressing, bathing)
- Fine and gross motor skills
- Pre-academic and academic skills
- Social skills (e.g., individual and group play)

Family Support

- Parent support groups or individual meetings
- Group and individual parent training
